About Us

SKYSUN, a subsidiary Product of Skysun Control & Lighting , was founded in 2010 as a major provider of Control & Lighting applications.

Skysun's constant focus towards alleviating the world's most preserving environmental challenges has motivated the team to develop green lighting solutions that reduce operating costs and improve productivity.

Skysun is developing Control & lighting solutions and making energy-wasting traditional lighting technologies obsolete through the use of energy-efficient, environmentally friendly Control & lighting. In light of key global trends and challenges - e.g. the demand for affordable healthcare, the energy efficiency imperative, and people's desire for personal well-being. we are confident in our chosen strategic direction.

Our Vision

Skysun's constant focus towards alleviating the world's most preserving environmental challenges has motivated the team to develop green lighting solutions that reduce operating costs and improve

productivity.
